

### **Creating a clinic disaster plan**

Everyone assumes “it won’t happen to me”. It is better to be prepared for a disaster than to regret not being after one happens. This lecture will give attendees the step by step instructions on how to create their own disaster plan for their clinic.

### **Addison's**

It’s been described as the great pretender. Don’t let it fool you. This disease can be deadly and it’s important to understand it and be able to help both pets and clients. This lecture reviews what it is, how it occurs, treatment and how to treat the emergency patient.

### **How to move from floor to supervisor**

Description: Often times technicians or assistants are given promotions to a supervisor or manager. There is not training that is offered. Instead, they are thrown in to the role. What does it mean to be a supervisor? This lecture will focus on the key points that separate a supervisor from a floor technician/assistant.

### **ER cases from the trenches**

We can all learn from each other victories and failures. This lecture reviews several ER cases where nursing care played a key role in the outcome of the patient. Attendees will leave with a better understanding of how to monitor and care for patients of any hospital.
