

Program Title: *Prehospital care and primary survey. Rita Hanel DVM, DACVIM, DACVECC*

Seminar Description:

This 45 minute seminar will provide background, current and future options for the prehospital care of dogs and cats. We will then review the XABCD approach to the primary and subsequent secondary survey, which facilitate timely and directed stabilization of the trauma patient.

Program Title: *Stabilization of the polytrauma. Rita Hanel DVM, DACVIM, DACVECC*

Program Description:

This 45-minute seminar will provide the knowledge and background to understand the mechanisms of injury contributing to polytrauma patients, with an emphasis on blunt trauma. This enables a more thorough and systematic approach to stabilization, which will incorporate the components of the primary survey discussed in the previous seminar.
