

**Abdominal POCUS: "A deeper dive"**  
(25 minute advanced lecture- VECCUS)  
Laura Cole & Simon Cook

**Stream:** VECCUS

**Length:** 25 minutes

This lecture is aimed at the clinician with experience of in abdominal point-of care ultrasound. It will highlight the role of ultrasound in helping answer clinically driven questions in the non-traumatic emergency and critical care patient.

**Intended learning outcomes**

- Recognise the utility and limitations of point-of-care ultrasound in management of the acute abdomen
- Extrapolate findings on point-of-care ultrasound in light of the patient's clinical presentation
- Formulate a plan for patient's care based on history, physical examination and point-of-care ultrasound findings
