

## **Tash Summerfield**

### **When kidneys go on strike: the great nephron rebellion**

This lecture on Acute Kidney Injury (AKI) will cover essential topics for ECC nurses. Learn about the nurse's role in patient detection and triaging, explore AKI diagnostics, and understand the distinctions between pre-renal, intrinsic renal, and post-renal injuries and their causes. We'll discuss treatment options during hospitalisation. This lecture will highlight the significance of nursing contribution to patient care.
